

BEP - Activities

Author : Tobias Hofmann

Date : June 24, 2015

Configuration steps to be executed on the SAP backend system (BEP) for SAP NetWeaver Gateway scenarios.

The configuration steps to be executed on the backend (BEP) are detailed at [SAP Help](#). The steps are for the OData Channel Service for backend system.

1. Settings for Idempotent services [Blog](#) / [SAP Help](#)
2. Defining a remote function call to SAP Gateway [Blog](#) / [SAP Help](#)
3. Connection settings to SAP Gateway [Blog](#) / [SAP Help](#)
4. Configure the bgRFC supervisor destination [Blog](#) / [SAP Help](#)
