

FND - 33 - Creating bgRFC supervisor destination

Author : Tobias Hofmann

Date : June 30, 2015

The configuration steps to be executed on the HUB system (FND) are detailed at [SAP Help](#). The steps are for the OData Channel Service for backend system.

1. Basic configuration activities: [SAP Help](#)
 - Set profile parameters to support SSO2 [SAP Help](#)
 - Activate ICF Services [SAP Help](#)
2. User & Authorization [SAP Help](#)
3.
 - SAP Gateway to Consumer (FND to SMP3) [SAP Help](#)
 1. Creating a bgRFC destination for outbound queues [SAP Help](#)
 2. Registering bgRFC destination for the outbound queue [SAP Help](#)
 3. Creating bgRFC supervisor destination [SAP Help](#)
4.
 - SAP Gateway to SAP Backend (FND to BEP) [SAP Help](#)
 1. Create RFC on SAP Gateway (FND) to SAP backend (BEP) [SAP Help](#)
 2. Define trust between SAP Gateway and SAP backend (FND BEP) [SAP Help](#)
 3. Configure SAP backend system (BEP) to accept assertion ticket from SAP Gateway [SAP Help](#)
 4. Configure SAP Gateway (FND) to accept assertion ticket from SAP backend (BEP) [SAP Help](#)
 5. Configure SAP system alias for applications [SAP Help](#)
5. Activate SAP NetWeaver Gateway [SAP Help](#)

This document explains how to execute step 3.3.

"The supervisor destination for bgRFC receives the configuration settings for the bgRFC scheduler and also starts or stops the schedulers as required."
