

Presentation SITMUC 2018

Author : Tobias Hofmann

Date : October 15, 2019

Event information

- Location: SITMUC 2018, Einstein Kultur
- Date: 13.10.2018
- Site: [Event website](#)
- Title: Creating apps with UI5
- Presentation: [PDF](#)

Additional information

- Make sure to select a language that supports the team, not just you.
- App development is not just coding: that's why the presentation is about creating apps. It's a team effort.
- Demo apps are mostly for myself and to make my life easier
- Cognitive Leave Request was developed by BridgingIT in partnership with Microsoft. More information about the project: [Tobias und Martin entwickeln](#). (Video in German)
- Testing is important. Several tools from and for UI5 are available that can be used or other tools. Just use them if you can.
